

Coinratecap

Greenpaper

Abstract

In the ever-evolving landscape of cryptocurrencies, security, innovation, community trust and values are paramount. Coinratecap presents a revolutionary approach to crowdfunding by introducing **uNFTs** (Unique Non-Fungible Tokens). These NFTs not only grant access to exclusive benefits but also foster a community of like-minded individuals, ensuring the success of your crypto journey.

Introduction

Coinratecap prides itself on providing comprehensive data analytics to the cryptocurrency communities. Our platform offers a range of features; coin and NFT listings, advanced charting tools, Launchpad and staking (Coming Soon), security scanning for potential vulnerabilities, KYC project integration, and a beginner-friendly learning hub.

Problem

We aim to address the lack of inclusive platforms for supporting innovative projects and fostering an empowering community with incentives, transparency and ethical practices.

Solution

We are building a launchpad with integrated 'share-to-earn' SocialFi functionality. The focus is on fostering a large, interconnected community in Africa and Asia within the cryptocurrency space. Also, we introduced the utility NFT which ensures long-term rewards and continuous global community support.

About Coinratecap Services

01

Coin/NFT listing

At Coinratecap, we support the top 10 blockchains for coin listing. List on our platform and have your project reach a wider audience.

02

Shield

You can shield your wallet by revoking access to tokens/platforms that pose a risk.

03

Honeypot

Our advanced honeypot tool allows you to scan any contract address to detect potential exit scam.

04

Coin Analystics

Analyze any token in real-time to help you make investment decisions.

05

Launchpad

(Coming Soon)

Community Project Overview

uNFT

Our Utility NFT (**uNFT**) serves as the central gateway to the Coinratecap Token Mining app and the entire ecosystem, providing users with access to an array of vital features and consistent rewards. Only 5,000 uNFTS will be minted before our Token Mining launch

Token Mining

Coinratecap's token minting app rewards the community for active participation and early adoption. All token minters will be airdropped with a substantial amount of coinratecap tokens upon token launch. Even after token launch, the token minting, learn to earn and many other activities will remain functional.

Share to Earn

We will integrate a minimalistic socialFi where token projects listed on Coinratecap will reward our community who share their project on Twitter. This reward will be given in Coinratecap token.

The uNFT Mechanism

Our mission to foster innovation is embodied in the uNFT crowdfunding mechanism.

We aim to raise **\$246,000** through the issuance of **5,000 uNFTs**, ensuring accessibility to a wide spectrum of crypto enthusiasts. By acquiring a uNFT, participants not only fuel innovation but also unlock an array of exclusive benefits.

Empowering the Future

Mining uNFTs is a tangible commitment to shaping the cryptocurrency landscape. It transforms participants into stakeholders, directly contributing to the growth and development of the CoinRateCap ecosystem. Funds raised through uNFT sales will be strategically directed to development, Token Mining, and marketing, ensuring project sustainability and success.

Benefits of uNFT

- ✓ **50% Share of Token Mining fees (Earn to infinity)**
50% of withdrawal fees paid by minters will be given to uNFT holders
- ✓ **Added to our ‘Trusted Circle’**
- ✓ **Automatic Whitelisting for presales and for exclusive future projects.**
- ✓ **Revenue Sharing Priority:**
Holders of uNFT tokens are eligible to participate in revenue-sharing mechanisms, enabling them to earn rewards as the platform thrives.
